Washington Natural Resources Information Portal - Phase I

The Washington Natural Resources Information Portal is designed to help stakeholders conduct quick and easy searches and access Washington State environmental and natural resource related datasets from a single website. The Portal can be queried by location, such as *county*, *watershed,* or *salmon recovery region*, by agency, theme category, or file type, and be searched on keywords.

This project was collectively designed via a team of state information managers who bring quality experience and insight on their agency datasets and have been tasked to make such information accessible to the public as part of a larger on-going salmon recovery effort.

The Portal can be accessed at: http://www.swim.wa.gov
